Biography

Dr. Shuangbo Liu (MD, FRCPC) is an assistant professor at the University of Manitoba. She is an interventional cardiologist and clinician scientist. Her clinical and research interests are focused on acute coronary syndrome and percutaneous coronary intervention outcomes as well as women's heart health (specifically SCAD and MINOCA).

Dr. Liu completed her MD at the University of Manitoba. She stayed in Winnipeg for Internal Medicine and Adult Cardiology training. In 2017, she moved to Toronto to pursue Interventional Cardiology fellowship at St. Michael's Hospital. When she completed her clinical training, she joined St. Michael's Hospital as a Clinical Associate. She was the lead in the St. Michael's Hospital SCAD clinic, while pursuing further research training. She will be completing her Master of Science degree (University of Toronto) in the fall of 2020.

Dr. Liu has always been interested in Women's Heart Health, since she was a trainee. She helped build the St. Boniface Hospital SCAD database. While in Toronto, she has built the St. Michael's Hospital SCAD database and has a number of research projects related to SCAD research.
