Centre for Outcomes Research and Evaluation
Montreal, QC

Biography

Dr. Louise Pilote is a Professor of Medicine at McGill University where she holds a James McGill chair. She is Deputy Director at the Research Institute of the McGill University Health Centre. She is a practicing general internist and led the McGill division of general internal medicine from 2006-2016. She has had the privilege to be a clinician scientist at Research Institute of the McGill University Health Center for the past 25 years.

Dr. Pilote is an internationally recognized sex and gender scientist, a leader in cardiovascular research and a pioneer in comparative effectiveness of cardiovascular drug and devices using Big Data with a focus on sex differences. She has developed novel methodologies for measuring gender to evaluate its impact on health outcomes. Dr. Pilote leads the Gender Outcomes International Group to Further Well-being Development (GOING-FWD), a data science and personalized medicine project.

Dr. Pilote brings her expertise in sex and gender sciences to bridge basic to epidemiological sciences through a translational outlook through the life span. Dr. Pilote strives to build capacity not only from a scientific discovery standpoint but also through advocacy and engagement with policy makers, and as a mentor to the next generation of scientists.
