Speaker Details

Thalia Field, MD, FRCPC, MHSc

Associate Professor, University of British Columbia
Neurologist, Vancouver Stroke Program
Sauder Family and Heart and Stroke Foundation
Professorship of Stroke Research
Vancouver, BC

Biography

Dr. Thalia Field is a stroke neurologist and clinician-researcher at the University of British Columbia where she is an Associate Professor and holds a Sauder Family/Heart and Stroke Professorship of Stroke Research, with a focus on clinical trials and stroke in younger adults. She is interested in stroke, vascular cognitive impairment and other post-stroke sequelae, particularly in high-functioning survivors, and how these intersect with equity considerations. She engages in collaborative work with patients to best learn how to characterize these outcomes in research. She is the principal investigator of the SECRET trial and parallel registry, which is examining treatment strategies and prognosis of cerebral venous thrombosis, a rarer stroke type that most commonly affects younger women, and is the co-chair for the Canadian Stroke Best Practice guidelines committee for the Management of Cerebral Venous Thrombosis.
