Jacqueline Saw, MD, FRCPC, FACC, FAHA, FSCA

Clinical Professor of Medicine

University of British Columbia

Program Director, Interventional Cardiology Fellowship Program

Interventional Cardiologist, Vancouver General Hospital

Vancouver, BC

Biography

Dr. Jacqueline Saw is an Interventional Cardiologist at Vancouver General Hospital and St Paul's Hospital, Clinical Professor of Medicine at UBC, and Program Director of the VGH Interventional Cardiology Fellowship Program. She served as Head of VGH Cardiology Clinical Trials Research. She is an active physician proctor for LAA closure with WATCHMAN and ACP/Amulet devices.

Dr. Saw is a pioneer in research and management of spontaneous coronary artery dissection (SCAD) and is the PI of the CIHR-funded multi-center prospective Canadian SCAD Study, and the Heart and Stroke Foundation funded Canadian SCAD Genetic Study. Other research interests include LAA closure, coronary fibromuscular dysplasia, antiplatelet therapy, carotid artery stenting, peripheral arterial disease and intervention. She is also PI of ASAP-TOO, PRYME, NACAD, SAFER-SCAD, Canadian WATCHMAN Registry, TAP-CABG, and ELAPSE studies. She has co-authored over 200 peer-reviewed publications, including scientific research manuscripts, review papers, book chapters and abstracts. She is also the editor of three textbooks on LAA closure and carotid artery stenting.
