Heart disease is on the rise and is the leading cause of death for women worldwide.

KEY MESSAGE # 1

VITAL STATISTICS FROM THE WORLD HEALTH ORGANIZATION MORTALITY DATA

QUESTIONS?
Visit WearRedCanada.ca or your healthcare provider.

Heart attack symptoms are not recognized in over 50% of women.

Women are more likely to present with 3 or more symptoms in addition to chest pain.

If you think someone is having a heart attack, seek immediate medical attention.

SYMPTOMS OF HEART ATTACK MOST OFTEN REPORTED BY WOMEN

- Chest pain or discomfort (ex. pressure, tightness, or burning)
- Pain in the jaw, neck, arm, or back
- Abnormal excessive sweating
- Shortness of breath
- Stomach pain or discomfort, or feelings of nausea or indigestion

OTHER ACCOMPANYING OR ASSOCIATED SYMPTOMS

- Unusual weakness or fatigue
- Back, shoulder or right arm pain
- Sleep disturbance
- Dizziness or light-headedness
- Fast or irregular heartbeat
Causes of heart disease can be different for women than men.

**Common causes of heart disease:**
- Coronary artery disease
- Valvular heart disease
- Arrhythmia (irregular heart beat)

**Women are more likely than men to have:**
- Spontaneous coronary artery dissection (SCAD)
- Coronary vasospasm
- Microvascular dysfunction (small-vessel disease)
- Takotsubo (stress-induced) cardiomyopathy (disease of the heart muscle)
- Peripartum cardiomyopathy (weakened heart during or after pregnancy)

Women can be at greater risk for heart disease than men.

The following conditions lead to a greater risk of heart disease:

- Certain pregnancy complications (ex. Premature birth, diabetes or hypertension during pregnancy, preeclampsia)
- Earlier menopause (Before age 40)
- Polycystic ovary syndrome
- Systemic inflammatory and autoimmune disorders (ex. Rheumatoid arthritis, lupus)
- Cigarette smoking (Women have 3x higher risk of heart attack due to cigarette smoking compared to men)
- Diabetes mellitus (Women living with diabetes are 3x more likely to die from heart disease compared to men)

Questions? Visit WearRedCanada.ca or your healthcare provider.

There is a lot we can all do to help reduce the risk. Heart disease is largely preventable.

- Be active, keep moving
- Eat a variety of healthy foods
- Manage stress
- Live free from commercial tobacco and vaping
- Limit alcohol
- Get regular check ups (test for blood sugars, blood pressure and cholesterol)

To take care of others, you need to first take care of yourself.
